### **DETAILED ACTION**

This action is responsive to the amendment filed 04-10-2003, which has been entered.

Claims 1-28 are currently pending.

### ***Drawings***

1. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 04-10-2003 has been approved by the examiner. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 and 8 rejected under 35 U.S.C. 102(b) as being anticipated by JP(60-65945). JP(60-65945) discloses a power transmission chain and tensioner comprising a plurality of sprockets (3, 4), a chain (5) wrapped around the plurality of sprockets, a rotary hydraulic fluid tensioner comprising a stationary portion (10), a rotatable portion (13) moveable in a planar rotation about a center pivot and in fluid communication with a hydraulic source, the rotatable body having an outer face provided with a tensioner arm (12) operatively connected thereto, the tensioner arm having a friction surface (7)

positioned in contact with at least one of the chain strands and the hydraulic pressure in the tensioner maintains the rotatable body in a position to hold the friction surface against the chain.

In claims 2-3, note the spring (14) that biases the tensioner arm.

In claim 8, JP(60-65945) discloses the claimed invention above, including the chamber (15).

In claim 10, it is apparent that the fluid is retained in the chamber to resist movement in the reverse direction.

In claim 11, note the valve (17).

In claim 13, it is apparent that the tensioner is positioned between the tight and slack strand of the chain.

#### ***Allowable Subject Matter***

4. Claims 14-28 allowed.
5. Claims 4-7, 9, 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

6. Applicant's arguments filed 04-01-2003 have been fully considered but they are not persuasive.
7. Applicant's arguments with respect to claims 1-3, 8, 10-11 and 13 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3682

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
